Product designer at UC Berkeley working across research, interaction design, and engineering. Experienced in shipping end-to-end digital products, building scalable design systems, and using AI-assisted workflows to prototype and develop interfaces.

WORK EXPERIENCE

Product Design Intern / UC Berkeley Information Technology

JUNE 2026 - PRESENT

Owned end to end design for an advising platform serving 20000+ students, re architecting static information architecture into a guided decision routing flow. Built journey maps to guide research, fielded a screener to 23000 students, and ran 9 moderated sessions. Used AI assisted workflows (Claude Code, Cursor, Figma MCP) to build a 90+ component design system with 600+ prototype interactions, then handed off to engineers in an Agile team on Jira.

Product Design Intern / Flourish AI

JUNE 2025 - SEPT 2025

Designed and shipped 2 mobile health products, including the MVP, from concept to launch under tight deadlines with product managers and engineers. Defined interaction patterns and loading and empty states for AI generated insights, and cut symptom interpretation time by 47% using user stories, task flows and Figma prototypes.

User Experience Designer / Carbon Sustain

SEPT 2024 - DEC 2024 / Contract

Designed a data dense sustainability analytics platform for a B2B client, translating business requirements into interaction flows and high fidelity visual design. Built accessible dashboards and data visualizations on a reusable component system so users could read complex state at a glance.

VP of Web Design / EthiCAL Apparel

JUNE 2020 - JAN 2021 / Part-time, remote

Scoped and led a 5 person team rebuilding the entire website, taking Figma designs to a shipped responsive React frontend. Designed the marketing and landing pages, driving an acquisition flow that supports 500+ monthly users and $3K+ in revenue. Taught team workshops on MCPs and pull request review.

EDUCATION

2026 | BA

UNIVERSITY OF CALIFORNIA, BERKELEY

Cognitive Science, Data Science, Design

SKILLS

Product Design
UX/UI Design
User Research
Usability Testing
Journey Mapping
Design Systems
Interaction Design
Wireframing and Prototyping
Motion Graphics
Front End Development

TOOLS

Figma, Figma Make, FigJam, Miro, Adobe Illustrator and Photoshop, Dovetail, Jira, Claude Code, Cursor, React, Storybook, PostHog, HTML/CSS/JavaScript

AWARDS

AMAZON MUSIC DESIGNATHON

Top 10 of 100+ Teams
