

# Diya Mahapatra

(925)-399-9619 | [diyamahapatra@berkeley.edu](mailto:diyamahapatra@berkeley.edu) | San Francisco, CA | [LinkedIn](#) | [Portfolio](#)

## EDUCATION

---

### University of California, Berkeley

*Bachelor's Degree in Cognitive Science, Data Science, and Design*

08/2023 – 12/2026

- Coursework: Design Methodology, Innovation and Design Thinking in Business, Research Design and Applications for Data and Analysis, Interface Aesthetics, Intro to Artificial Intelligence, Creative Programming and Electronics

## WORK EXPERIENCE

---

### Product Design Intern

06/2026 – Present

*UC Berkeley Information Technology*

- Synthesized 300+ student survey responses and Google Analytics data using AI-assisted thematic analysis, uncovering patterns that informed product strategy for a platform serving 45,000+ UC Berkeley students.
- Re-architected the advising experience by replacing static information architecture with a guided decision-routing workflow, validating wireframes and high-fidelity prototypes through moderated usability testing.
- Directed AI coding agents through the Figma Plugin API to generate 90+ reusable UI design system components, 600+ prototype interactions, and automated QA workflows to present to cross-functional stakeholders.

### Product Design Intern

06/2025 – 09/2025

*Flourish AI*

- Collaborated with product managers and engineers to design and ship 2 AI-powered mobile-app health experiences, creating user-centered experiences from concept through launch.
- Synthesized user interviews, customer feedback, and usability findings into personas, user flows, and high-fidelity Figma prototypes, reducing symptom interpretation time by 47%.
- Designed intuitive interaction patterns for AI-generated meal logging and health insights, iterating through usability testing to improve accessibility, visual clarity, and user trust.

### UX Engineer

01/2025 – 06/2025

*Bentolicious*

- Redesigned the end-to-end mobile ordering experience, improving information architecture and visual hierarchy to increase direct orders by 60%.
- Built production-ready frontend experiences using AI-assisted development (Cursor + Claude), translating Figma designs into responsive interfaces while iterating rapidly on UX.

### UX Designer

09/2024 – 06/2025

*Carbon Sustain*

- Translated business requirements into visual concepts, interaction flows, and prototypes for enterprise sustainability dashboards, bridging stakeholder goals and end-user needs across a complex data-heavy domain.
- Designed accessible dashboards and data visualizations that improved data comprehension by 40%, balancing information density with usability for enterprise customers.

## LEADERSHIP

---

### VP of Web Design

09/2025 – Present

*EthiCAL*

- Led a 5-person cross-functional team to rebuild an end-to-end e-commerce platform, partnering with engineering to deliver customer-centered digital experiences.
- Designed and optimized an end-to-end acquisition flow using PostHog analytics, supporting 500+ monthly users and generating \$3K+ in revenue through iterative product improvements.
- Led UX strategy for a role-based shift management platform, defining user flows, information architecture, and interaction patterns through stakeholder research while supporting payment and operational workflows.

## SKILLS

---

**Tools:** Figma, FigJam, Miro, Adobe Creative Cloud, Jira, Qualtrics, Claude, Cursor, HTML/CSS, JavaScript, Git

**Skills:** Product Design, UX/UI Design, User-Centered Design, Competitive Analysis, User Research, Information Architecture, Wireframing, High-Fidelity Prototyping, User Flows, Design Systems, Responsive Design, Accessibility (WCAG), Usability Testing, Cross-Functional Collaboration, Agile
